Economic Geography: Vol 96, No 4

Economic geography takes a variety of approaches to many different topics, including the location of industries, economies of agglomeration (also known as "linkages"), transportation, international trade, development, real estate, gentrification, ethnic economies, gendered economies, core-periphery theory, the economics of urban form, the relationship between the environment and the economy (tying into a long history of geographers studying culture-environment interaction), and globalization.

Economic geography - Wikipedia

Economic Geography presents advances in economic theory that explain why, despite the increasing mobility of commodities, ideas, and people, the diffusion of economic activity is very unequal and remains agglomerated in a limited number of spatial entities. The book complements theoretical analysis with detailed discussions of the empirics of the economics of agglomeration, offering a mix of theoretical and empirical research that gives a unique perspective on spatial disparities.

Economic Geography: The Integration of Regions and Nations ...

Economic geography was, during the period, essentially an industrial geography dealing with the problems of industry and regional economic development. The end of the postwar economic growth in major developed countries, the end of the golden age of capitalism, and the worldwide stagnation of regional and urban problems were all new questions for economic geographers.
