---

Economic methodology -  
Wikipedia

Economic Models: An economic model is a simplification of reality which abstracts from the complexities of the real world in order to explain economic phenomena and to make predictions. Models can be expressed in various ways. The most obvious is to use words; most of the economic models are verbal models. They can also be expressed diagrammatically.

Method of Economists |

Course Notes

In this article we will discuss about the methods used in economic analysis. Economics can be a very deductive subject, and economists are used to constructing complicated 'models' of human behaviour which begin with a range of assumptions. However, economics is also an empirical subject, using inductive methods to explain observed facts.
